

TPTracker® for your Community Support Team

PROFILE ♦ INFORM ♦ SUPPORT

Manage your programmes of community or personal support.

Track individual clients through their intervention programmes and evaluate the outcomes achieved and its impact on them.

Track programme inputs and outputs then evaluate the value for money and social impact achieved by the overall programme.

Profile clients

Build a central database of your clients (prospective, current and past) with their contact details, profile, background information and history. TPTracker® will automatically link everything recorded to their personal record.

Profile programmes

Build a database of all your programmes; TPTracker® will link all the background information, events, engagements, inputs and outputs you record to them AND to the relevant client files.

TPTracker for SOCIAL HOUSING PROVIDERS

Analyse programmes

Use the on-screen reporting and analysis toolkit to interrogate individual events, programmes, funding sources, delivery partners, etc. or any combination, to give you the reports you need.

Evaluate impact

Track all the engagements and other interventions for an individual client and evaluate their impact with your choice of Key Performance Indicators (for binary outcomes such as 'Back in work') or Star Charts (for incremental changes such as 'Level of self-confidence').

Social valuation

Outcomes can be translated into social values to give you a 'Quick View' of the relative impact achieved. Use this to determine an approximate 'ranking' of your programmes or to identify those programmes worthy of more detailed evaluation.
