

TPTRACKER[®]
for charities

Software solutions for **CHARITIES** and **SOCIAL ENTERPRISES**

Two different solutions for two different key activities

For Fundraising Teams

Track and analyse your donations,
manage Gift Aid and send 'Thankyous'

Database of Donors, Supporters, Friends and Volunteers

For Service Delivery Teams

Manage and evaluate your community
support and service delivery programmes

Database of Clients or Service users

Who is it for?

TPTracker[®] is specifically designed for your needs as a Charity, Social Enterprise or Community Interest organisation. It's a big step up from spreadsheets, yet still affordable and easy to use.

We offer two separate **TPTracker**[®] software solutions, because each is focused on the needs of a specific team and the databases at the heart of each solution are best kept separate.

For the Fundraising Team

Here, the database will include your donors, friends, supporters or volunteers linked to modules for profiling them, keeping them informed and tracking their donations or other income. **TPTracker®** also includes automated 'Thankyou' messages sent by SMS or Email based on the donor's preference.

For the Service Delivery Team

The database here will include your clients or service users, linked to modules for profiling them, keeping them informed and tracking the service or support provided to each of them. **TPTracker®** provides all the tools you need for analysing, evaluating and reporting on each programme.

How will it benefit us?

Clear navigation with easy indexing and look-ups will allow your team to quickly find, interpret and share the information they need:

SPEED: Look up contact details, profiles, personal preferences or GDPR consent.

INFORMATION: Search records of communications and activities by person, group or programme.

COMPLIANCE: Store data securely in compliance with GDPR rules.

SIMPLICITY: You get just the functionality you need, making **TPTracker®** very easy to use.

How many people can use it?

Our most popular feature is that YOU control who has access to your **TPTracker®** system. You pay for a single licence fee per organisation and can have as many users as you need. With **TPTracker®** you can rest assured that as your team grows, the costs won't keep escalating up.

Are there any upfront costs?

No. We will listen to you, put together a package to meet your needs, format and upload your existing data for you and train you to get started. All you pay for is an annual / monthly licence fee to use it and any optional on-site training, if needed. We like to keep things simple!
